

Check2gether

SAVING LIVES AT BIRTH

The result: 47,000 women in Northern-Ghana reached in 400 communities for less than 8\$ per person

REGULAR PREGNANCY

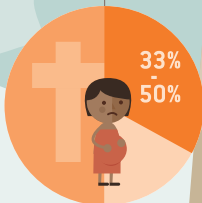

PREGNANCY WITH CHECK2GETHER

Delayed ANC because of socio-cultural factors (hidden pregnancies)

Low quality ANC services in the village

33-50% are a result of hypertension and post-partum hemorrhage

Maternal Deaths

Community Health Worker equipped with: non-invasive test kit (blood pressure, urine and HB tests) + mobile app

Peer-oriented antenatal care (ANC) groups

Timely advice on healthy pregnancies and safe deliveries

Peer-oriented ANC group sessions

Nation wide impact measurement to convince the government to further implement
